ABOUT ME

I am deeply passionate about website designing, development, and WordPress customization. With a proven track record of delivering high-quality projects, I consistently strive to create captivating and functional designs. From creating visually stunning designs to implementing complex functionalities, I thrive on the challenges presented by each new project.

OBJECTIVE

I am seeking a position within an organization or design firm in Frontend/Backend Development. My objective is to create better interfaces and programs for the user, making website designing & development technology easier for the user.

SKILLS

HTML	CSS	JavaScript	PHP
Laravel	React	Node Js	Bootstrap
Wordpress
